DETAILED ACTION

This communication is in response to the document dated 11/02/06. Claims 1-43 and 46-60 are pending in the application. Claims 1, 20, 26, 34, 40, and 46 are independent claims.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-43 and 46-60 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Regarding claims 1-43 and 46-60, these claims recite a computerized system/method for augmenting data from a source database with data from a reference database to generate an augmented database that can be used for predictive modeling, but fails to recite a tangible result, a requirement for compliance with the provisions of 35 U.S.C. § 101 in view of the Interim Guidelines for Examination of Patent Applications for Patent Subject Matter Eligibility, published on 26 October 2005, which can be found at http://www.uspto.gov/web/offices/pac/dapp/opla/preognotice/guidelines101_20051026.pdf, particularly with respect to ANNEX IV Computer-Related Nonstatutory Subject Matter, beginning on page 50.

For a result to be tangible, it must be more than just a thought or a computation; it must have real-world value rather than an abstract result. For instance, for example, displaying the data resulting from the operation to a user. Claim 1 merely cites "a data mining component configured to conduct searches of data in the augmented database" as the result.
